- 21. **DIGITAL ASSETS:** Do not forget your digital assets! Digital assets can be the most troublesome to deal with upon incapacity and/or death. Some examples of digital assets are personal assets (i.e., Flickr, Instagram, Shutterfly), social media assets (i.e., Facebook, Twitter, email accounts), financial assets (i.e., online access to bank and investment accounts, online shopping accounts), and business accounts (i.e., eBay, Dropbox). We recommend that you keep an inventory of each of these assets that lists, at a minimum, domain name, user name, and password and update the inventory at least annually. This list will aid your family and Executor to shut down all necessary accounts upon your death. At your request, we will provide a chart that will assist you in preparing this inventory. A copy of the inventory should be placed with your other original documents pursuant to paragraph 22 below.
- 22. **SAFEKEEPING:** These are important documents. We encourage you to place the originals of these documents in a safety deposit box or other secure and fire proof place. If you place your estate planning documents in your safety deposit box, then we suggest you title the safety deposit box in the name of the trust, if one is created, so that your successor Trustee has access to your documents upon your death; provided, however, if the safety deposit box remains titled in your name, then we suggest naming someone else that you trust with access so that upon your death that person has access and a court order will not be required to gain access to your safety deposit box. If provided by you, our office will maintain signed copies of the access card for emergency reference.
